Closing comments

- Facilities & software:
  - Some choices ahead for facilities
  - Flurry of activity getting benchmark results – also need to consider whole work-flow performance
  - Discussion as to software priorities under SciDAC
- Leadership resources
  - Some discussion for projects.
  - More requests are solicited
  - Science is first: however, constraints on job sizes & relative costs of analysis are considered to optimize USQCD physics program
- Sub-topics:
  - The SPC decided to organize topical sessions, with session leaders. The idea was to stimulate discussion as to priorities.
  - These topics also help to understand priorities for USQCD.
